

# Elevate : Empowering Educators

Teachers have three loves :

**Love of learning, love of teaching and love of children**

Our school believes that the key to unlocking students potential lies in empowering our educators . To achieve this, OIS organised a series of training sessions for our teachers, focusing on innovative teaching methods, technology integration, and student - centered learning. During the sessions, interactive

workshops expert guest lecturers, collaborative learning etc. were included. The training sessions have had a positive impact on our teachers' confidence and competence. Our school plans to continue providing regular training and development opportunities to ensure our educators remain updated and inspired.

## Disaster Management

**Building Resilience :** Disaster Management Disaster management training at the school level is crucial for equipping students and staff with the knowledge and skills to handle emergencies effectively. Trainers Mr. Madan Bandodkar & Mr. Vishal Singh conducted interactive sessions, drills, and workshops to address potential disasters such as fires and other emergencies. Specific emphasis is placed on fire safety, including how to use a fire extinguisher effectively by following the PASS method (Pull, Aim, Squeeze,

Sweep). Trainers also taught evacuation procedures tailored to the school and school bus scenarios. Students and staff learnt to locate and use emergency exits, stay low to avoid smoke inhalation and follow designated escape routes. Demonstrations are conducted to simulate fire situations in both classrooms and buses, ensuring participants understand how to respond calmly and efficiently. These activities build a culture of preparedness, fostering confidence and resilience in managing crises.
